Converting Fractions to Percentages

Complete the chart. You may use a calculator

Fraction	Decimal	Percentage	Fraction drawing
$\frac{8}{12}$			
$\frac{4}{6}$			
$\frac{2}{10}$			
$\frac{3}{5}$			
$\frac{1}{9}$			

Which two fractions are equivalent (or equal)? Circle the answers.

- $\frac{8}{12}$ $\frac{4}{6}$ $\frac{2}{10}$ $\frac{3}{5}$ $\frac{1}{9}$

If you're not a hundred percent confident about the topic of percentages, grab our pdf percent worksheets now! Flesh it out and reveal new layers around why percents and percentages never cease to matter in everyday life. Our printable resources contain a range of tasks such as finding the percentage of a shaded region using grids and shapes, calculating percent of change, solving percent word problems, finding percent error, and more. Remember to verify the answer with the included answer key. These free worksheets are most recommended for students in grade 6, grade 7, and grade 8. CCSS: 6.RP. 7.RP Converting Decimals, Fractions, and Percents (Basic) AFREEA Convert the fractions and decimals into percents and complete the table. All fractions are out of 100. 5th through 7th Grades Write each percent as a fraction (and vice-versa). Includes a word problem too. All fractions are out of 100. 5th through 7th Grades Percentages Worksheet AFREEA Convert each fraction into a percent, then convert the percents into fractions, then solve the word problem. 5th through 7th Grades Solve each percent word problem. All fractions are not out of 100, so students must have a familiarity with equivalent fractions. 5th through 7th Grades Calculate Your Weight on Other Planets Use the formula to calculate your weight on other planets, example: The gravity of Venus is 90% of Earth's gravity. To calculate your weight on Venus, multiply your weight by 0.9. 4th through 6th Grades Math worksheets and visual curriculum This website uses cookies We and our advertising partners use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from. On this page you find our grade 5 and 6 percent and percentage worksheets. Studying about percents and percentages in school is quite challenging. The definition of percent means literally 'per 100'. 1% means '1 out of every 100' and 20% means '20 out of every 100. The basic concept of percents is relatively easy to understand when we have 100 marbles or squared blocks and we pick that 1 or 20 out of these 100. It becomes more challenging when we have a total of 50 marbles and we have to pick 20% of them. In this example we need to combine our percentage knowledge with either decimal or fraction skills. Both the decimal and fraction methods are learned in grade 5 in the Singapore math curriculum. In grade 5 the outcome of percentage calculations are whole numbers, whereas in grade 6 the outcome can contain (rounded off) decimals. Our percentage worksheets follow the Singapore curriculum. Even more challenging are the concepts 'What Percent?' and 'Original Amount'. When we have to calculate the percent, we are given the percentage and the original amount. An example could be: what percent is 10 (percentage outcome) out of 20 (original amount)? The answer is In the case of calculating the 'Original Amount', we are given the percent number and the percentage outcome. An example of this could be: \$10 is 25% of ?. I'm an NQT+2 who teaches Maths in Dorset. I've taught a bit of German in the past so you'll find more than just Maths resources on my page! Last updated 30 July 2018 A basic worksheet to help my Year 9s understand that just because 12 parts of a shape are shaded, that doesn't necessarily mean 12% of the shape is shaded! I got my class to first of all determine the fraction shaded, and then change the denominator to 100 to determine the percentage shaded. It comes in 2 parts - in the first part, the denominators of the fractions multiply easily up to 100. In the second part, they don't. e.g. 18/40, so they need to be simplified first. Solutions are provided. Creative Commons 'Sharealike' Select overall rating (no rating) Your rating is required to reflect your happiness. Write a review Update existing review It's good to leave some feedback. Something went wrong, please try again later. A good resource. Thanks for sharing. Empty reply does not make any sense for the end user Great worksheet a very useful resource. Thanks Empty reply does not make any sense for the end user Thank you for this! Very useful for my students. Empty reply does not make any sense for the end user Just what I need for a very mixed Y9 class. Thank you. Empty reply does not make any sense for the end user Resourceful as always. Top quality content from a top quality teacher. Empty reply does not make any sense for the end user Report this resource to let us know if it violates our terms and conditions. Our customer service team will review your report and will be in touch. Percent of the Shaded Region: Blocks Engage in this series of base 10 blocks worksheets that contain nine problems per page. Discern and count the shaded squares to determine the percentage of the shaded area. Percent of a Whole Number Each 6th grade worksheet contains 14 problems calculating the percentage of whole Use the response keys to check your answers. Percentage of a decimal number Find the value that constitutes an equivalent percentage for each decimal and surround them to the nearest cent. Comparative quantities: with word problems Perform percentages. Then compare them and insert the symbols $>$ $=$ $<$ appropriate in the boxes. Word problems are also furnished to help students grasp the concept of quantity comparison. Percentage on a numerical line Depending on the models of the given numerical line, fill the boxes with the appropriate percentages or numbers. These printable worksheets form a great visual help for students of 6th degree and 7th degree in understanding percentages. Find the value of the Unknown Read each question carefully to find the unknown percentages, basic values or amounts. Ask your answers to the nearest cent. Percentage of increase or decrease: with Word problems Based on the original quantity, find the change ratio in quantity. Then, calculate the percentage of increase or decrease. Each worksheet includes a number of word problems suitable for students of 7th degree and 8th degree. students.
